Jim Keppler
Senior Maintenance Supervisor – Grounds
1692 Sycamore Drive
Simi Valley, Ca. 93065

Dear Jim,

As director of the Santa Susana Railroad Depot & Museum and on behalf of the Rancho Simi Foundation I want to personally express our appreciation for your support and contribution. With the help of Ron Territ and Tim Bixby, the installation of two- (2) block signal semaphore poles, on the street side of the depot are now completed. This project would not have been possible without your generosity. With the completion of this project, we now have another wonderful piece of railroad history that will be preserved for all to enjoy for many years to come.

Ron and Tim had a plan as to how this job was to be performed, with regard to effectiveness and safety. Their skills to accomplish their task were outstanding. They worked with the Mass Electrical Corp group in a very professional and courteous manner; both are very good employees.

It is people like you that help enhance the museum to come alive with the past and make the museum what it is today. I would like to invite you to visit the museum and take a trip into the past. I am sure that you will enjoy our artifacts, displays and history of the depot, along with the HO scale railroad model layout.

Sincerely,

Thomas Bergh
Museum Director
